SUMMARY

DevOps Engineer with 3+ years of experience in Linux infrastructure, AWS cloud environments, CI/CD automation, and Kubernetes-based deployments. Skilled in Terraform, Jenkins, Ansible, and production support across enterprise-scale systems.

SKILLS

Cloud Platforms: AWS, Azure

Containers & Orchestration: Docker, Kubernetes, Helm, ArgoCD

Infrastructure as Code: Terraform, Ansible

CI/CD & Automation: Jenkins, GitHub Actions, Shell Scripting, Git

Operating Systems: Linux (SUSE, RHEL), Windows Server

Monitoring: CloudWatch, Prometheus

EXPERIENCE

DevOps Engineer - Stikbook | Toronto, Canada

Jan 2025 - Apr 2025

- Automated AWS environment scheduling using Terraform and CloudWatch for ECS and RDS resources, optimizing infrastructure utilization and reducing unnecessary cloud costs.
- Designed Ansible Tower workflows to automate Windows VM disk expansion in vSphere environments, eliminating repetitive manual operations and improving operational efficiency.
- Built Jenkins CI/CD pipelines integrating Docker-based application deployments, reducing build failures.
- Resolved deployment issues to support stable cloud-based production releases.

System Administrator - Tata Consultancy Services (TCS) | Gandhinagar, India

Oct 2020 - May 2023

- Managed and monitored 600+ Linux servers in SLA-critical production environments, ensuring high availability.
- Automated Linux maintenance workflows using shell scripting, reducing manual operational effort.
- Led incident response and root cause analysis for production outages, restoring services within SLA timelines.
- Performed patching, upgrades, and maintenance on SUSE Linux systems with minimal downtime.

PROJECTS

Kubernetes 3-Tier Application Deployment | [GitHub](#) - Deployed a containerized 3-tier application on Kubernetes using Docker with rolling updates and self-healing.

GitOps Deployment with Helm and ArgoCD | [GitHub](#) - Implemented GitOps-based Kubernetes deployments using Helm and ArgoCD for consistent releases

AWS Infrastructure Provisioning using Terraform | [GitHub](#) - Automated AWS infrastructure provisioning using Terraform for scalable application deployment.

CERTIFICATIONS

AWS Certified Solutions Architect - Associate

2024 - 2027

HashiCorp Certified: Terraform Associate (003)

2024

EDUCATION

Lambton College - Post Graduate Certificate in DevOps for Cloud Computing

2023 - 2025

VVP Engineering College - Bachelor of Engineering in Information Technology

2016 - 2020
